ADDENDUM TO CRPO Update February 19, 2014:  
Grandfathering Application Information

In the CRPO Update February 19, 2014, #1 stated: Everyone practicing "psychotherapy" has to belong to the CRPO by the very day the Act is proclaimed in order to continue their practice. With the exception of those belonging to the College of Social Work, Psychology and Physicians.

To clarify:

There are 5 Ontario regulatory colleges (nurses, occupational therapists, physicians, psychologists and social workers) whose members are entitled to practice psychotherapy, including the controlled act of psychotherapy. They may also use the title "psychotherapist" along with their regulated title, as long as they follow rules set by their college for the use of titles.

** Members of other colleges will not be able to use the title "Registered Psychotherapist" or RP.

Someone who chooses to be a member of two statutory regulatory colleges will be required to meet the obligations of membership of both colleges, including participation in quality assurance programs, and payment of two membership fees. In addition, they will be required to keep separate records for the two practices.
